

Implementation of DBMS

Exercise Sheet 9, Solutions

Klingemann, WS 2024 / 2025

1) Delete from the B+-tree of order 4 you produced in task 1 of Sheet 8 the keys 25, 45, 24, 38, 32, 8, 27, 46, 13, 42, 5, 22, 26, 7 in this order.

Solution:

Deleting 25, 45, 24, 38 → underflow:

Transfer of 35:

Deleting 32 → underflow:

Merge:

Deleting 8, 27, 46 → underflow:

Merge:

Deleting 13 → underflow:

Merge 1:

Merge 2:

Deleting 42, 5, 22 → underflow:

Merge:

Deleting 26 → underflow:

Transfer of 20:

Deleting 7 → underflow:

Merge:

2) Insert the keys 20, 40, 10, 30, 15, 35, 7, 26, 18, 22, 29, 32 in this order into an initially empty B-tree with order 2.

Solution:

Inserting 20, 40, 10 → overflow:

Split:

Inserting 30, 15, 35 → overflow:

Split:

Inserting 7 → overflow:

Split 1:

Split 2:

Inserting 26, 18, 22 → overflow:

Split:

Inserting 29, 32 → overflow:

Split 1:

Split 2:

3) Delete from the B-tree of order 2 you produced in task 2 the keys 7, 30, 10 in this order.

Solution:

Deleting 7 → underflow:

Transfer:

Deleting 30, replacing by next larger key in tree → underflow:

Merge 1:

Merge 2:

Deleting 10 → underflow:

Merge:

Transfer:
